CCLT CROWN CAP LEAK TESTER–
CROWN CAPS SEALING TESTER

Used for testing the air-tightness of the caps. The tester is made of stainless steel in order to ensure its durability.

Cap the capsule on the neck of the bottle mold, plunge the cap in the water tank, then increase the internal pressure and see if there are air bubbles coming out, so that to test the air tightness of the caps.

Widely used in breweries, beverages and caps manufacturing.

Technical data :
Pressure Range: Max.1.2Mpa (174PSI)
Gas: N2, CO2 or compressed air
Type of closure: Caps
Dimension: 250 X200 X200 mm
Weight: 4kg

HDC - TESTER FOR HEIGHT AND THICKNESS OF CLOSURES AND CAPS

This unit has an excellent basis for testing, crown height and thickness are measured by dial screen. It is widely used in factories of crowns, beers and beverages.

Technical data :
Measuring range: 0 - 10mm
Accuracy: 0.01 mm
Dimensions: 100 x 100 x 160 (W x H x D)
Weight: 1 kg
