PPG-A, PPG-D – APPARATUS FOR MEASURING THE PERPENDICULARITY OF PREFORMS

The "PPG-A" and "PPG-D" are used to test the perpendicularity of the PET bottle.
These are standard equipment for PET bottle industry and beverage industry.

Unlike other instruments, they can actually avoid measurement errors made by the bride. Equipped with a sizing column, it can ensure absolute accuracy.

This instrument consists of a rotating collet, of a Mitutoyo digital indicator, a calibration column and a vertical pillar.

The preforms with different diameters of bottle opening are equipped with rotary grippers and a special calibration column. Please provide the specifications of the bottle when you order.

PPG-A

PPG-D(Mitutoyo indicator)

Technical data :

Resolution: 0, 01 mm
Dimension: 420 x 250 x 250 mm (WxDxH)
Weight: 10 kg
.
